

DETERM

DESCRIPTION:

Easy-to-use, environment-friendly flame cleaner for wall boilers and gas burners allowing a better combustion and optimizing the consumption.

INSTRUCTIONS FOR USE:

Insert a small plastic cane into the delivery valve of the aerosol bomb. Make the boiler of the water heater work by opening the hot water tap. Put the small cane into the flame device and spray at short intervals both on the device and upwards for a thorough cleaning. During the product delivery the flame will increase.

When the equipment is not covered it is possible to repeat the operation downwards. Provide yourself with a rag to prevent foam from coming out the small cane between the two operations. Repeat the operation every month with DETERM to ensure a better performance and a considerable reduction of pollution.

WARNINGS:

Shake well before use. Since gutting residues could stain, put some newspapers or rags under the equipment. Can under pressure.

PHYSICAL AND CHEMICAL PROPERTIES:

Physical state	Container under pressure with base and liquefied gas
Odour	Peculiar
Colour	White
Specific weight @ 20 °C	0,93
Can volume	520 ml
Aerosol product volume	400 ml
Pressure @ 20 °C	3,5 Bars
Aerosol product flash point	Not inflammable
Propellant flash point	Lower than 0 °C
pH	Alkaline
Water solubility	Soluble
Oil solubility	Insoluble
Foaming power	Foaming

INGREDIENTS:

Nitrato d'Ammonio, Ossalato d'Ammonio, Idrossido d'Ammonio, Laurilsarcosinato di Sodio, Petroleum Distillates.
